Chidiebere Chukwudi
Senior PHP Developer

linkedin.com/in/chidieberechukwudi/
Github: <https://github.com/jovialcore>

I am a software developer with **6 years** of experience in general web development and software engineering. I have a diverse skill set that includes **PHP, Laravel, Vuejs/Nuxt Javascript, AlpineJS, Bootstrap, Docker, Python, Nodejs, wordpress-api, MySQL, Tailwind and CSS3**. I also share some of my knowledge via technical writing on my [blog](#).

Work Experience

Software Engineer

[SchoolTwist](#)

April 2025 - Present

Technologies used: **PHP, LARAVEL, MYSQL, PEST.**

Responsibilities:

- Improving a learning management system. Adding more features in addition to upgrading the platform.
- Customized and extended the content editing experience by adding Laravel-based components to improve UI interactions and introduce a flexible theming feature.

Backend Team Lead Laravel Developer

[Kominiti](#)

July 2023 - July 2025

Technologies used: **PHP, LARAVEL, MYSQL, PAYMENTS, STRIPE, AZURE, SANITY, PHPUUnit.**

Responsibilities:

- Developed and refactored APIs for the digital marketplace platform that onboards digital artisans, freelancers, clients, etc., resulting in a 40% improvement in system scalability in php and laravel.
- Designed and wrote the php API endpoint for seller and buyer dashboards, optimizing user experience, resource management, and access.
- Built a mini escrow service for the new payment systems, reducing transaction failures by 75%.
- Developed a Wallet payment feature for this system.
- Connecting the payment platform to Stripe Connect for payouts, Stripe webhooks to ensure a seamless and efficient payment integration process with php/laravel.
- Oversaw the migration of old users from the old application to the new application.
- Refactored the previous payment system, increasing transaction speed by 50% and significantly cutting maintenance costs by 30%, contributing to a better user experience and increased revenue.
- I am the internal domain expert for payment and wallet flow plus stripe for kominiti payment.

[Kominiti Wall](#)

- Kominiti socials is a subsystem of the main kominiti core. A social platform of kominiti referred to as WALL
- I wrote the php/laravel api that improved social interaction flow for the wall. This includes how users connect with other users, suggesting profiles, posts integration, comments, etc

[Kominiti Jobs](#)

- Kominiti jobs is a job platform that is an extension of kominiti. Working with the frontend developer, I wrote the php/laravel api for most functionality on jobs platform. Recruitment flow and Application flow.
- The core functionalities include, posting of jobs, applying to jobs, search and elegant filtering, notifications, etc.
